Thank you . As you can see from the aerial pic below , although the facility is technically being proposed for West Warwick it is right on the EG line near residential areas , New England Tech as well as a day care .

There are many concerns including..

- How close should this be to a preschool / daycare and residential homes (see aerial view below)? Although technically in West Warwick is right on EG line near residential area as well as abutting Coventry , West Warwick .
- are there requirements for filters on any air stacks ?
- how is this plant cleaned and how often ?
- wastewater concerns as this property is on a pond and in a well water area .
- will this be regulated by the Clean Air Act ?
- there has been NO safety planning committee produced and even the R.I. DEM seemed concerned with little to no testing being done on such experimental technology.

Thank you again and look forward to hearing from you .

Best Regards ,

Subject: Public concerns regarding location MED RECYCLER Facility being proposed for 1600 Division Road, West Warwick

"A relatively untested technology that cooks medical waste to generate electricity is proposed for a local office and warehouse building."

<https://www.ecori.org/renewable-energy/2020/2/23/ck9nv4mw8075yzszrdvy2tb3ep2xe5?fbclid=IwAR38milruzHw0rdYR161WSm3jaaBWOe2pl7G4ywMy21Kkx076mpgqMji0-A>

" The Conservation Law Foundation (CLF) has noted that emissions from pyrolysis contain cancer-causing compounds. The ash consists of dioxins, mercury, and heavy metals — pollutants that can make their way into waterways and drinking water supplies. The applications submitted to DEM says the facility will emit or have as byproducts carbon dioxide, carbon monoxide, silicon dioxide, magnesium oxide, iron oxide, sodium chloride, and sodium sulfide"

As an East Greenwich resident this is NOT something I want close to my home .

I am writing to register my concern regarding the permit approval for the proposed Med Recycler site for 1600 Division Rd. This facility is very close to the residential area where I live , Signal Ridge, as well as many of the homes here are on well water. In fact, I have already seen that the "MED RECYCLER" name has been added to the 1600 Division Rd sign which seems a bit premature.

The petition below further elaborates community concerns as in less than 2 days it has gotten 600 signatures (and counting) representing how alarmed the community is with this project. It was also request that West Warwick and Coventry residents be added as they also have issue with the facility in a residential community.

<https://www.change.org/p/west-warwick-town-council-stop-proposed-med-recycler-site-for-1600-division-rd-approval/u/25946141>

I would like additional information on where this stands with EPA approval and when the public will be able to weigh in with their concerns regarding the location.

Thank in advance for your consideration. I look forward to hearing from you .
